PROFILE

Second-year BS Computer Science student specializing in Artificial Intelligence at FEU Institute of Technology, building foundations across software development, databases, web technologies, and AI-oriented product thinking. Currently developing personal software projects while strengthening practical skills in programming, debugging, database design, and product development.

EDUCATION

FEU Institute of Technology

Expected 2029

Bachelor of Science in Computer Science - Specialization in Artificial Intelligence

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, SQL, NASM Assembly (fundamentals)
Web: HTML, CSS, JavaScript
Databases: SQLite, relational database design, CRUD operations, SQL joins
Tools: Git, GitHub
Core Concepts: Object-Oriented Programming, debugging, input validation, database transactions, data integrity

PROJECTS

Yab's Business Management System | In Progress

Python | SQLite | SQL

- Building a business management system centered on staff records, sales transactions, transaction items, and commission tracking.
- Designing relational data structures with primary/foreign keys and applying CRUD operations, joins, validation, and integrity constraints.
- Practicing reliable financial-data workflows using parameterized queries and atomic database transactions with COMMIT/ROLLBACK behavior.

Personal Developer Portfolio | In Progress

Web Development | GitHub

- Developing a personal portfolio to present technical projects, skills, education, and ongoing work through a responsive web experience.
- Applying front-end development fundamentals and iterative UI implementation while maintaining the project with version control.
